

LEGAL ENGINEERING AGREEMENT

# Statement of Work (SOW)

— Scope, acceptance, and intellectual property defined —

Full-Stack Engineering

Next.js · React · TypeScript ·  
FastAPI · PostgreSQL

Autonomous AI Workflows

LLM orchestration · RAG  
pipelines · MCP systems

Robotic Process Automation

Playwright headless bots at  
computational speed

Transparent Pricing

Published rates. Free working  
prototype before any payment  
commitment.

Engineering-First Culture

The founder writes production  
code personally on every client  
project.

Deterministic AI

Strictly typed scaffolding  
enforced around every  
probabilistic LLM call.

8+

Platforms

Omni-channel autonomous  
publishing engine

100%

Custom-Built

No templates. Every pixel  
engineered from scratch.

SECTION 9.3

# Acceptance Criteria & Quality Gates

The Project shall be deemed complete and accepted when all five criteria below are satisfied:

- 1

All features outlined in the signed Scope (section 9.2) function correctly without critical errors in the production environment.
- 2

The UI renders correctly on modern versions of Chrome, Safari, and Firefox on both desktop and mobile viewports.
- 3

The database securely reads and writes data according to all defined Row Level Security (RLS) policies and user roles.
- 4

All API endpoints return correct JSON responses for every documented input schema, including edge cases and error states.
- 5

The application achieves a Google Lighthouse Performance score of 85 or above in the production environment.

Upon delivery, the Client has [X] business days to report bugs for immediate remediation before final sign-off.

SECTION 9.4

FORMAL CHANGE ORDER REQUIRED FOR THE FOLLOWING:

- Any new feature, integration, or design requirement not listed in the signed Scope document (section 9.2).
- Structural UI changes requested after frontend development has commenced in the engineering phase.
- Additional API integrations, third-party platforms, or automation scripts beyond those in section 9.2.
- Database schema modifications that affect existing tables after the staging environment is live.

Change Orders billed at standard LIT rate. Scope changes may alter delivery timeline.

# Intellectual Property, Confidentiality & Termination

Upon receipt of the final 30% payment, all rights, titles, and ownership of custom source code produced exclusively for this project transfer to the Client. It retains rights to pre-existing proprietary scripts, libraries, and base-framework architectures.

## Confidentiality

Both parties maintain strict confidentiality of all proprietary business data, API keys, internal workflows, database schemas, and business intelligence shared during the engagement. This obligation survives project completion and contract termination.

## Termination

Either party may terminate this agreement with 14 days written notice. The Client will be billed proportionally for all engineering hours completed to the termination date.
