INTERNAL TEMPLATE NOTE — REMOVE BEFORE ISSUE

Blank fields and underlined spaces are filled in per client (manually or by the LIT Command Center). Legal and commercial clauses are a starting framework and should be reviewed by qualified counsel for the jurisdictions and transaction involved before you rely on them.

LOGIC INTELLIGENCE TECHNOLOGIES

01 Document Information

This Statement of Work ("SOW") and Service Agreement sets out the scope, deliverables, schedule, commercial terms and governing conditions under which Logic Intelligence Technologies ("LIT") will deliver the project described below for the Client. It should be read together with the related documents listed here.

RELATED DOCUMENT	REFERENCE	ROLE IN THIS ENGAGEMENT
Project Proposal	LIT-PROPOSAL-_____-_____-_____-_____-_____-_____-	Commercial basis accepted by the Client
Client Onboarding Guide	LIT-Client-Onboarding-Guide	Access and information handover after signing
Technical Specification	LIT-TECHSPEC-_____-_____-_____-_____-_____-_____-	Detailed technical design, issued after onboarding
Change Requests	LIT-CR-_____-_____-_____-_____-_____-_____-	Any approved change to this SOW

LOGIC INTELLIGENCE TECHNOLOGIES

03 Project Overview

FIELD	DETAIL
Project name	
Project ID	
Engagement type	
Planned start	
Target completion	
Primary platform	

04 Business Objectives

The project is successful when the following measurable objectives are met. Each objective maps to one or more deliverables in Section 6 and acceptance criteria in Section 12.

ID	OBJECTIVE	SUCCESS MEASURE
OBJ-01		
OBJ-02		
OBJ-03		

05 Scope of Work

LIT will perform the following work. Anything not expressly listed here is out of scope and may be added only through the Change Control process in Section 15.

WORKSTREAM	INCLUDED ACTIVITIES
Discovery & architecture	Requirements confirmation, technical specification, architecture and data model design

LOGIC INTELLIGENCE TECHNOLOGIES

WORKSTREAM	INCLUDED ACTIVITIES
Frontend	
Backend & APIs	
Database	
Integrations	
Deployment	Production and staging environments, CI/CD pipeline, domain and TLS configuration
Handover	Documentation, credential and ownership transfer, walkthrough session

06

Deliverables

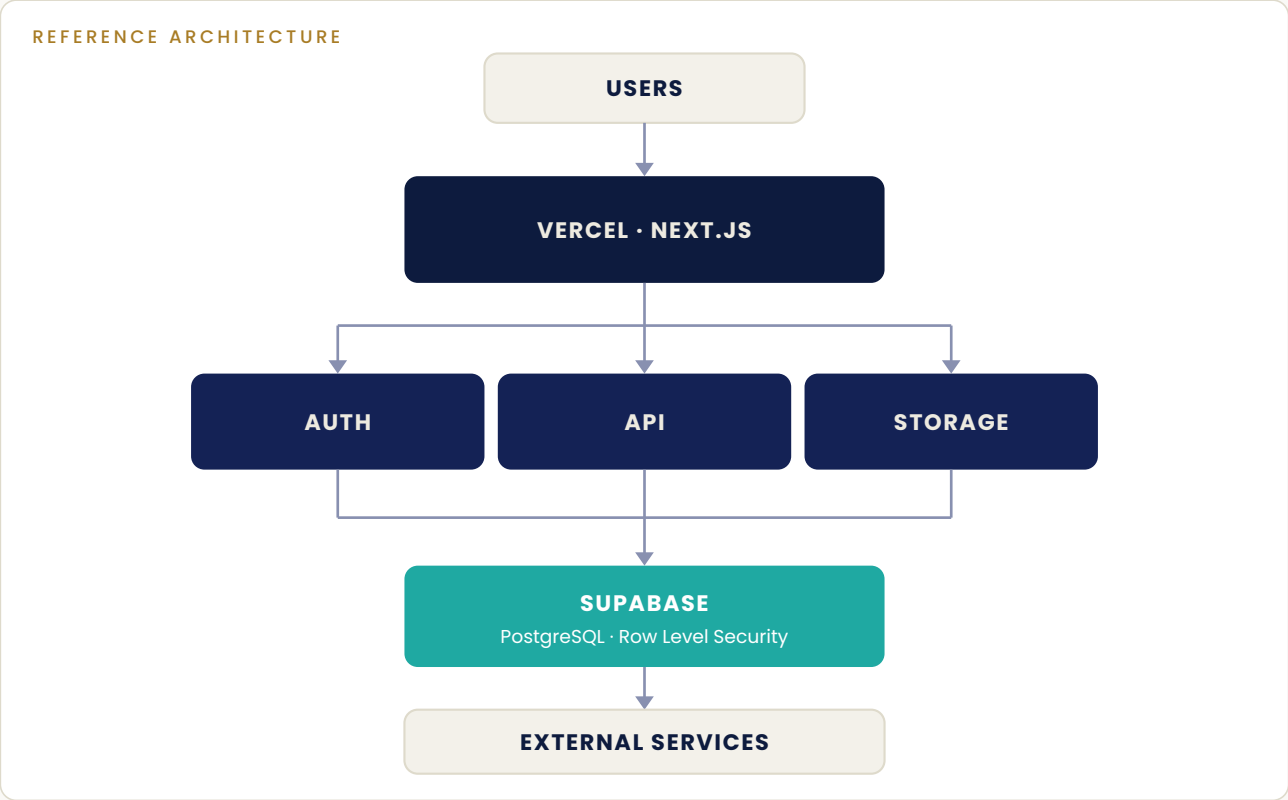

ID	DELIVERABLE	DESCRIPTION	ACCEPTANCE
D-01	Technical Specification	Approved design document for the solution	AC-01
D-02			AC-02
D-03			AC-03
D-04			AC-04
D-05	Production deployment	Live system on the agreed domain	AC-05
D-06	Handover documentation	Operating notes, architecture summary, access register	AC-06

LOGIC INTELLIGENCE TECHNOLOGIES

07 Technical Architecture

The indicative architecture below is confirmed or refined in the Technical Specification. The final diagram is generated from the project’s actual architecture.

Indicative only. Components are confirmed per project in the Technical Specification.

08 Delivery Schedule & Milestones

MILESTONE	DESCRIPTION	TARGET DATE	PAYMENT LINKED
M1	Kick-off and onboarding complete – access and information received		
M2	Technical Specification and design approved		
M3	Core build complete on staging		
M4	User acceptance testing complete		
M5	Production launch and handover		

LOGIC INTELLIGENCE TECHNOLOGIES

Dates assume the Client meets the responsibilities in Section 9. Delays in Client inputs move dependent milestones by an equivalent period.

09

Client Responsibilities

- ◆ Nominate a single point of contact with authority to make decisions and approve deliverables.
- ◆ Provide business information, content, brand assets and existing system details listed in the Onboarding Guide.
- ◆ Grant delegated, least-privilege access to required accounts (GitHub, domain/DNS, cloud, Supabase, Vercel) — never by sharing passwords.
- ◆ Review and respond to deliverables within _____ business days of submission.
- ◆ Own, and pay for, third-party accounts and subscriptions unless stated otherwise in Section 19.
- ◆ Carry out user acceptance testing and confirm acceptance in writing.

10

LIT Responsibilities

- ◆ Deliver the scope in Section 5 to professional engineering standards.
- ◆ Provide _____ written progress updates and flag risks or delays as soon as they are known.
- ◆ Maintain source code in a version-controlled repository the Client owns or will receive at handover.
- ◆ Follow the security practices in Section 18 and the Client's reasonable written policies.
- ◆ Provide documentation and a handover walkthrough on completion.

11

Dependencies & Assumptions

- ◆ _____
- ◆ _____
- ◆ Third-party services remain available on materially the same terms during the project.
- ◆ Scope, schedule and fees are based on the information available at signing.

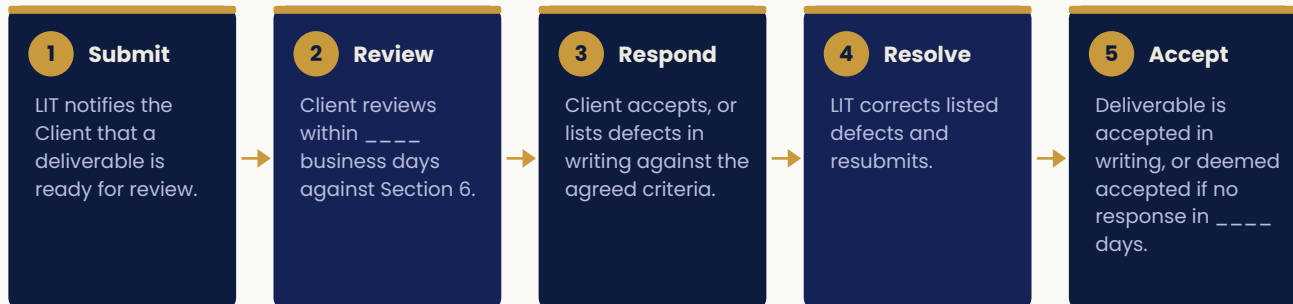

LOGIC INTELLIGENCE TECHNOLOGIES

12

Acceptance Criteria

Each deliverable is accepted through the following process:

Defects are deviations from the agreed scope or specification. New requirements raised during review are handled through Change Control.

13

Commercial Terms

ITEM	DESCRIPTION	AMOUNT
	Core implementation	
	Integration	
	Deployment	
	Support	
	Total (excluding taxes)	

Fees are exclusive of applicable taxes (_____). Third-party costs are billed as set out in Section 19. Pricing is populated per engagement by the LIT Command Center.

14

Payment Schedule

INSTALMENT	TRIGGER	SHARE	AMOUNT	DUE
1	SOW signature			
2				
3	Production launch & handover (M5)			

Invoices are payable to the account details stated on the invoice. Late payment may pause work on subsequent milestones until the account is brought current.

15

Change Control

Either party may propose a change to scope, schedule or fees. Changes are documented in a Change Request (LIT-CR-_____-_____) stating the technical, schedule and commercial impact. No change is binding until both parties approve the Change Request in writing; until then, work continues against this SOW.

16

Intellectual Property

- 16.1 On receipt of full payment, the Client owns the custom deliverables created specifically for this project, including source code and design files.
- 16.2 LIT retains ownership of its pre-existing materials, internal tools, frameworks and know-how. Where these are incorporated into the deliverables, LIT grants the Client a non-exclusive, perpetual licence to use them as part of the deliverables.
- 16.3 Open-source components remain subject to their own licences, which LIT will identify in the handover documentation.
- 16.4

17

Confidentiality

- 17.1 Each party will keep the other's confidential information secret and use it only to perform this agreement.
- 17.2 Confidential information excludes information that is public, already known to the recipient, independently developed, or lawfully received from a third party.
- 17.3 These obligations survive termination for _____ years.

18

Data Handling & Security

- | | |
|------|--|
| 18.1 | LIT accesses Client systems using delegated, least-privilege accounts. Passwords, API keys, private keys and tokens are never exchanged by email or the standard onboarding form. |
| 18.2 | Secrets are stored only in environment variables or secret managers of the relevant platform, never in source code. |
| 18.3 | Client data is processed solely to deliver this project and in line with applicable data protection laws, including the Digital Personal Data Protection Act, 2023 where applicable. |

LOGIC INTELLIGENCE TECHNOLOGIES

- 18.4** On project closure, LIT returns or deletes Client data in its possession and the Client revokes LIT's access unless a support agreement is in force.

19 Third-Party Services

SERVICE	PURPOSE	ACCOUNT OWNER	COST BORNE BY
Vercel	Frontend hosting & deployments		
Supabase	Database, auth and storage		
Domain registrar / DNS	Domain and DNS records		

LIT is not responsible for outages, pricing changes or policy changes of third-party services outside its control.

20 Support / Warranty

For _____ days after production launch, LIT will correct defects in the delivered scope at no additional charge. Warranty does not cover new features, changes made by others, or third-party failures. Ongoing maintenance is available under a separate Maintenance & Support Agreement (LIT-SUPPORT-_____-_____-_____).

21 Limitations / Exclusions

- ◆ Content writing, photography and translation unless listed in Section 5.
- ◆ Third-party licence, subscription and usage fees.
- ◆ Legal, regulatory or compliance advice.
- ◆ _____
- ◆ Neither party is liable for indirect or consequential loss _____.

LOGIC INTELLIGENCE TECHNOLOGIES

22 Termination / Project Closure

- 22.1 Either party may terminate on _____ days' written notice if the other materially breaches this agreement and fails to remedy the breach within that period.
- 22.2 On termination, the Client pays for work performed up to the termination date, and LIT delivers work in progress paid for.
- 22.3 The project closes when the final deliverable is accepted, handover is complete and the Delivery & Acceptance Report is signed.

23 Authorization & Signatures

By signing below, each party confirms that it has read and agrees to this Statement of Work and Service Agreement, and that the signatory is authorized to bind the party they represent.
