

OFFICIAL CORPORATE DOCUMENT

Company Profile & Executive Overview

— Where Logic Meets Innovation —

Full-Stack Engineering

Next.js · React · TypeScript · FastAPI
· PostgreSQL

Autonomous AI Workflows

LLM orchestration · RAG pipelines ·
Playwright RPA

Robotic Process Automation

Headless bots · 24/7 execution ·
legacy systems

Transparent Pricing

Published rates. Free prototype
before any payment.

Engineering-First

The founder writes production
code on every project.

Deterministic AI

Strict JSON scaffolding on every
LLM integration.

8+

Platforms

Omni-channel publishing

100%

Custom-Built

No templates. Ever.

₹8,999

Starting From

Digital Launch — 4 weeks

COMPANY

Logic Intelligence Technologies

FOUNDER

Vikash Saravanan

LOCATION

Coimbatore, Tamil Nadu, India

WEBSITE

logicintelligencetechnologies.in

“Where Logic Meets Innovation” — every system we architect, every line we deploy.

Visit logicintelligencetechnologies.in to explore services, case studies, and pricing packages.

CORE SERVICES

Full-Stack Web Apps

AI & LLM Integration

Robotic Process Automation

PostgreSQL & Supabase

CI/CD & DevOps

E-Commerce Platforms

RAG Pipelines

API Engineering

SECTION 01

Executive Overview

Logic Intelligence Technologies (LIT) is a premium AI engineering firm founded in Coimbatore, Tamil Nadu. We build autonomous software ecosystems — not websites. From full-stack Next.js applications to Robotic Process Automation pipelines and Large Language Model integrations, we engineer systems that act as digital workforces for enterprise clients. Every system is backed by strictly deterministic architecture, typed APIs, Supabase RLS security, and production-grade CI/CD deployment pipelines.

MISSION

To architect deterministic, robust software ecosystems and autonomous AI workflows that empower enterprises to scale operationally without proportionally scaling headcount — delivered transparently, on time, at honest prices.

VISION

To become South India's definitive autonomous intelligence firm — where every client workflow is powered by self-operating AI pipelines, zero-overhead deployments, and logic-driven engineering that sets a new global standard for digital operations.

"We do not build websites; we build digital workforces. Engineering is the product — the interface is merely the proof."
Vikash Saravanan · Founder & Lead Engineer

WHY LIT?

- ◆ Free prototype before any payment commitment
- ◆ Founder personally codes every project
- ◆ Transparent pricing published at logicintelligencetechnologies.in
- ◆ Deterministic AI: typed, tested, validated

CORE ENGINEERING PHILOSOPHY

◆ **Deterministic Scaffolding**

AI is a controlled component in a strictly typed system. Structured JSON outputs, Pydantic validation, robust error handling on every call.

◆ **Uncompromising UI/UX**

Premium dark-mode aesthetic. Interfaces ruthless in functionality, surgical in execution. Every component intentional and accessible.

◆ **Security at the Foundation**

Row Level Security in Supabase, encrypted API orchestration, environment-variable secrets. Data integrity non-negotiable.

◆ **Engineering Rigor**

AI guarded by deterministic scaffolding and strict validation layers. Reliable software, not impressive demos.

◆ **Transparent Partnership**

Pricing published online. Free prototype before payment. Scope written and signed before production code begins.

SECTION 02

Core Capabilities

- 1

A • Full-Stack Web Architecture
React/Next.js with SSR/SSG hybrid rendering. Sub-100ms load times. TypeScript-first, Tailwind CSS, Supabase Auth, Vercel CI/CD. Lighthouse 90+ before handoff.
- 2

B • Autonomous Workflow & RPA
Python and Playwright headless bots navigate web interfaces identically to humans at computational speed. If a human clicks it on a schedule, a LIT bot handles it.
- 3

C • AI & LLM Orchestration
Claude, Grok, OpenAI APIs via strictly constrained prompts and JSON schema enforcement. RAG pipelines, context-aware decision engines, DOM-parsing AI agents.
- 4

D • Scalable Database Engineering
PostgreSQL schema design, Row Level Security at SQL layer, Supabase real-time, edge function deployment. GitHub Actions CI/CD with automated testing.

INDUSTRY APPLICATIONS

Healthcare Technology
Secure patient management with HIPAA-aligned RLS policies protecting PII.

Enterprise Operations
Custom ERP integrations and automated auditing bots at scale.

E-Commerce & Retail
Inventory forecasting, price monitoring, AI support routing systems.

EdTech Platforms
Automated grading pipelines and student portal integrations.

SECTION 03

Founder's Pedigree

VIKASH SARAVANAN

Founder & Lead Engineer — Logic Intelligence Technologies
B.Tech AI & Data Science · Rathinam Technical Campus, Coimbatore

Vikash Saravanan bridges academic AI theory and ruthless commercial software execution. His portfolio includes the Meta PyTorch Global Hackathon submission OpenEnv-Debugger and HearWise Child Health, a secure healthcare platform with complex Supabase RLS policies. He writes production code on every LIT client project — no intermediaries, no outsourced execution.

ENGINEERING PORTFOLIO HIGHLIGHTS

- ◆ **OpenEnv-Debugger**
Meta PyTorch Hackathon
Python CLI tool using AI to parse error logs and autonomously resolve PyTorch environment conflicts for ML engineers. Deterministic software harnessing AI.
- ◆ **HearWise Child Health**
Full-Stack Healthcare Platform
Secure Next.js/Supabase platform with complex RLS policies protecting pediatric PII. Lighthouse 96 score. Real users in production.
- ◆ **Omni-Apply RPA**
Autonomous Bot Architecture
DOM-scraping Playwright bot with LLM API integration for autonomous web portal navigation and form completion. 100 portals simultaneously via Python asyncio.
