Where Logic Meets Innovation

Brand DNA & Philosophy

THE BRAND STORY

Logic Intelligence Technologies was born from a conviction: that Coimbatore's businesses deserve the same calibre of digital engineering as India's largest tech hubs — without opaque pricing, template recycling, or agency middlemen. Founded by Vikash Saravanan, an AI & Data Science specialist, the company bridges raw data and autonomous digital solutions through full-stack engineering, practical AI integration, and production-ready software that works on day one.

MISSION

To architect and deploy production-grade digital systems that turn business logic into measurable, automated outcomes — delivered transparently, on time, and at honest prices.

VISION

To become South India's leading autonomous intelligence firm — where every client's workflow is powered by self-operating AI pipelines, zero-overhead deployments, and logic-driven engineering.

CORE VALUES

- ◆ **Relentless Automation**
Every repeated manual step is a deployment target. We engineer autonomous systems that execute workflows without human intervention, from data ingestion to content publishing.
- ◆ **Architectural Precision**
Code is infrastructure. We design scalable, type-safe systems using Next.js, TypeScript, and PostgreSQL — built to last, not to demo.
- ◆ **Transparent Partnership**
Every project starts with a written scope. Pricing is published, not invented on a call. A free prototype runs before a rupee moves.
- ◆ **Practical Intelligence**
AI must solve real business problems. We integrate LLMs, RAG pipelines, and RPA bots that produce measurable ROI — not proof-of-concept slides.
- ◆ **Engineering-First Culture**
The founder writes production code. No sales intermediaries, no outsourced execution. What we quote, we build — in-house, in Coimbatore.

Color Palette

Colors communicate personality and capability. The LIT palette is built for high-contrast digital surfaces — prioritising dark-mode precision while remaining legible across all mediums.

Logo Guidelines

LOGO RULES

- ◆ **Clear space**
Minimum 25px on every side. Never crowd the logo.
- ◆ **Minimum size**
80px / 0.83 inch width. Below this, clarity is lost.
- ◆ **Dark mode**
Use full-color logo on #0D1B3E or darker backgrounds.
- ◆ **Light mode**
Use dark-wordmark variant on #F7F4EE or white surfaces.
- ◆ **Web favicon**
Use icon mark only (brain circuit) at 32×32px and below.

NEVER DO THIS

- Never rotate or skew the logo
- Never apply drop shadows or outer glows
- Never change logo colors outside the approved palette
- Never place on a busy photographic background
- Never stretch or compress proportionally

Brand Voice & Tone

AUTHORITATIVE

We speak with the confidence of engineers who have deployed systems, not pitch decks.

TECHNICAL

We use precise terminology. Jargon is correct when it's the right word for the right audience.

CONCISE

No filler copy. Every sentence must earn its place. If it doesn't add clarity, it gets cut.

SOLUTION-FIRST

Problems are named. Solutions are architected. Outcomes are measured. That is our sequence.

Services & Packages

Full-Stack Web Development

Starting from
₹8,999+

- ◆ Custom front-end & back-end
- ◆ API integrations
- ◆ Deployment & hosting
- ◆ Post-launch support

E-Commerce Platforms

Starting from
₹18,999+

- ◆ Secure payment gateways
- ◆ Inventory management
- ◆ Admin dashboard
- ◆ Mobile-optimised shopping

Custom Software / CRM

Starting from
₹50,000+

- ◆ Requirement analysis
- ◆ Workflow automation
- ◆ Secure data architecture
- ◆ Ongoing maintenance

AI-Powered Solutions

Starting from
Custom

- ◆ LLM & RAG pipeline setup
- ◆ AI chatbot integration
- ◆ ML-powered features
- ◆ Automation workflows

Omni-Channel Publishing Guidelines

LIT's Autonomous Publishing Engine routes content to 8 platforms simultaneously. Each platform demands distinct tone, format, and visual language.

LinkedIn
Thought leadership · Technical architecture deep-dives · Case studies · Founder updates · Professional tone · 1,200–1,500 char posts

X (Twitter)
Concise technical insights · Builds in public · Threads for architecture walkthroughs · Under 280 chars + screenshots

Instagram
Visual UI/UX showcases · Dark-mode IDE code snippets · Behind-the-scenes reels · Carousel architecture diagrams

Threads
Casual developer commentary · Short-form technical humour · Product WIP shots · Community-first tone

Discord
Real-time developer updates · Community Q&A channels · Deployment notifications · Open-source collab threads

Telegram
Bot-powered project updates · File deliverables · Milestone announcements · Direct client channel notifications

Facebook
Local Coimbatore business community · Service announcements · Event promotions · Longer-form company stories

Website CMS
Long-form technical case studies · RAG pipeline documentation · Package detail pages · SEO-optimised blog

Buyer Personas

The Scaling Tech CEO

₹50K+ budget

Early-stage to Series-A startup founders who have outgrown their first website and need an enterprise-grade digital platform, AI assistant, or custom CRM to handle their operational scale.

- ◆ Needs: Scalable architecture, AI integration, fast time-to-market
- ◆ Pain: Generic SaaS tools don't fit the workflow; agency costs are opaque
- ◆ Solution: LIT Enterprise Pack + custom RPA automation to replace manual ops

Full-Stack Dev AI Integration Enterprise Pack

The Enterprise Ops Director

₹25K-₹1L budget

Operations Directors at mid-sized Coimbatore firms — manufacturing, logistics, hospitality — seeking Robotic Process Automation to eliminate repetitive data entry, form processing, and inter-system transfers.

- ◆ Needs: Playwright-based RPA bots, ERP integrations, workflow automation
- ◆ Pain: Staff spending 40+ hours/week on tasks a bot should handle
- ◆ Solution: Custom Software pack + RPA bot deployment + Redis queue management

RPA Bots Custom Software Workflow Automation

The E-Commerce Founder

₹8K-₹25K budget

Small business owners in Coimbatore's textile, food, and retail sectors going digital for the first time. They need a credible online store with payment gateways, inventory management, and zero technical debt.

- ◆ Needs: E-commerce site, WhatsApp integration, inventory dashboard
- ◆ Pain: Existing platforms (Shopify/Wix) are expensive and generic for India
- ◆ Solution: Digital Launch or Business Pro Pack + free demo before commitment

Imagery & Media Guidelines

USE THESE — APPROVED IMAGE STYLES

- ◆ **Abstract data visualisations**
3D neural network renders, geometric gradient meshes, topology maps — all in the LIT colour palette.
- ◆ **Dark-mode IDE screenshots**
Real code in VS Code / Cursor with the LIT Cyan syntax highlight theme. No placeholders.
- ◆ **Architecture diagrams**
Node-and-edge system diagrams, pipeline flowcharts, infrastructure maps with tech stack logos.
- ◆ **Product UI mockups**
Dark-themed dashboard screens, mobile app frames, and browser mockups showing real deliverables.
- ◆ **Founder & team photos**
Clean, minimal backgrounds. No stock-photo poses. Candid engineering environment preferred.

NEVER USE — BANNED IMAGE CATEGORIES

- Generic stock photos**
No people pointing at laptops, shaking hands over contracts, or staring at whiteboards.
- Bright/pastel backgrounds**
LIT is a precision-engineered brand. Pastel infographics undermine authority.
- Clip-art style icons**
All iconography must be geometric, line-based, and consistent with the Phosphor or Lucide library.
- Unbranded screenshots**
Never share client interfaces without explicit permission and data anonymisation.
- Low-resolution assets**
All exported assets minimum 2× retina. Social imagery minimum 1080×1080px.
- Competitor branding**
Never reference, screenshot, or compare against named competitors publicly.
