Knowledge Assistant

— RAG for operators who cannot afford an invented tariff. —

Full-Stack Engineering

Next.js · React · TypeScript · FastAPI
· PostgreSQL

Autonomous AI Workflows

LLM orchestration · RAG pipelines ·
Playwright RPA

Robotic Process Automation

Headless bots · 24/7 execution ·
legacy systems

Transparent Pricing

Published rates. Free prototype
before any payment.

Engineering-First

The founder writes production
code on every project.

Deterministic AI

Strict JSON scaffolding on every
LLM integration.

RAG

Architecture

pgvector · Grok · Groq fallback

SECTION 01

The Problem

YOUR DOCUMENTS. NOT THE OPEN WEB.

The model may only speak from chunks indexed from files you own. Prices stay constrained facts. If the corpus lacks the tariff, the bot must say so — not invent one.

Generic chatbots do not know your room rate. If they invent one, you pay for it. Tariffs live in Drive folders, WhatsApp threads, and printed binders. The night desk cannot search them at 11pm. The lead is lost. Brochure GPT invents GST figures and triggers refunds — that is an operational failure, not an AI limitation.

WHERE THE PROBLEM LIVES

- ◆ Tariffs live in Drive, WhatsApp, and printed binders
- ◆ Night desk cannot search at 11pm — lead is already lost
- ◆ Brochure GPT invents GST and refund policy — ops failure
- ◆ No citation = no audit trail when a rate is disputed

SECTION 02

The Solution

Retrieve the passage that is allowed to be true. If the passage has no price, the bot must say so — not invent one. Cite the sheet. This is controlled inference, not 'we trained GPT on your data.' Every answer is auditable, every rate is sourced.

HOW IT WORKS — FOUR STEPS

- 1 Ingest**
Your files loaded into a controlled corpus — Drive, PDF, WhatsApp exports, digitised binders.
- 2 Vectorise**
pgvector + hybrid search. Prices stay constrained facts. No hallucination on a missing chunk.
- 3 Generate**
Grok (xAI) primary with Groq fallback — same never-invent rule enforced on both models.
- 4 Capture Lead**
Answer with source citation. Escalate to WhatsApp. You own the documents.

SECTION 03

SECTION 04

Product — Citations, The Fit & Commercial

An assistant that cannot escalate is a liability. The Knowledge Assistant always has a human in the loop — every answer includes a citation, every booking query ends with a WhatsApp handoff. The bot is a filter and a router, not a replacement for the front desk.

PRODUCT FEATURES

- ◆ **Auditable Chunks**
Citations on every rate and deadline. Dispute resolution is a document lookup, not a conversation.
- ◆ **Never-Say-X List**
Claims your brand cannot make — configured per client, enforced at the system prompt layer.
- ◆ **Escalation Protocol**
Always: 'I will connect you to the desk.' Then WhatsApp. No dead ends.
- ◆ **Zero Invented Prices**
If corpus lacks the tariff, answer is: 'I don't have that rate — let me connect you.' Not a guess.

YES — WITHIN SCOPE

- ◆ FAQs: room types, tariffs, check-in/out, amenities
- ◆ Internal ops: HR policy, SOPs, shift schedules
- ◆ Retail: product specs, pricing sheets, return policies
- ◆ Tariffs: constrained to indexed docs, cited per answer

NO — OUTSIDE SCOPE

- ◆ Legal advice or medical diagnosis
- ◆ Live booking or real-time CRM writes
- ◆ Unlimited document corpus on day one
- ◆ Answering questions outside the indexed corpus

4-WEEK DEPLOYMENT TIMELINE

Week 1 — Corpus

Ingest your files. Define scope, never-say-x list, escalation flows.

Week 2 — Golden Set

10 benchmark questions including 2 real prices. Accuracy gate.

Week 3 — Widget

Staging widget on your site. Review answer quality live.

Week 4 — Live

Production deployment. Invent-a-price = zero score = no retainer.

COMMERCIAL TERMS

No monthly seat until you have seen ten live answers on your files. Custom from ₹1,50,000. Packs from
