

YOUR JOURNEY FROM FIRST CALL TO LIVE SYSTEM

Client Onboarding Guide

— Transparent. Collaborative. Delivered on time. —

Full-Stack Engineering

Next.js · React · TypeScript · FastAPI
· PostgreSQL

Autonomous AI Workflows

LLM orchestration · RAG pipelines ·
Playwright RPA

Robotic Process Automation

Headless bots · 24/7 execution ·
legacy systems

Transparent Pricing

Published rates. Free prototype
before any payment.

Engineering-First

The founder writes production
code on every project.

Deterministic AI

Strict JSON scaffolding on every
LLM integration.

CORE SERVICES

Full-Stack Web Apps

AI & LLM Integration

Robotic Process Automation

PostgreSQL & Supabase

CI/CD & DevOps

E-Commerce Platforms

RAG Pipelines

API Engineering

SECTION 01

The Onboarding Journey

Working with Logic Intelligence Technologies is designed to be the most transparent engineering experience you have ever had. Our process eliminates surprises, protects your investment, and ensures you see real working software before you spend a single rupee beyond the discovery session.

Phase 1 — Discovery & Scope

Week 1

Free consultation call. Technical feasibility assessment. Architecture recommendation. Full scope document written and provided for your review.

- ◆ 30-minute call with Vikash Saravanan personally
- ◆ Scope document: features, pages, APIs, integrations
- ◆ Technology stack recommendation with justification
- ◆ Fixed-price quote with full itemised breakdown

Phase 2 — Free Prototype Build

Weeks 1-2

A working prototype built at no cost on our staging environment. You see real functionality — not a mockup. This is our commitment: prove value before asking for payment.

- ◆ Functional staging deployment you can click through
- ◆ Core user flows implemented and testable
- ◆ Design system applied — dark mode, typography, palette
- ◆ Feedback session before production build begins

Phase 3 — Contract & Payment

End of Week 2

Once satisfied with the prototype, a formal contract is signed. 50% advance payment collected. Production build begins immediately.

- ◆ Written scope contract — both parties sign
- ◆ 50% advance invoice (Razorpay/bank transfer)
- ◆ GitHub repository created with your access
- ◆ Production timeline confirmed with milestone dates

SECTION 02

Production & Handoff

Phase 4 — Production Build

Weeks 3-5

Full production codebase built with TypeScript strict mode, Supabase RLS, Pydantic validation on all APIs, and GitHub Actions CI/CD. Weekly progress updates with staging links.

- ◆ Weekly staging deployment with new features
- ◆ Linting, type checking, unit tests on every push
- ◆ GitHub commits visible in your repository in real time
- ◆ Lighthouse 90+ enforced throughout build

Phase 5 — QA & Review

Week 5-6

Three rounds of structured feedback. Regression testing after every change. Bug tracking via GitHub Issues, transparent and shared with you.

- ◆ 3 structured revision rounds included in all packages
- ◆ Cross-browser and mobile device testing
- ◆ GitHub Issues for transparent bug tracking
- ◆ Final Lighthouse audit and performance optimisation

Phase 6 — Deployment & Handoff

End of Week 6

Full production deployment to Vercel + Supabase cloud. DNS configuration. SSL certificate. Full handoff documentation delivered.

- ◆ Vercel production deployment with custom domain
- ◆ Supabase production database with migrations applied
- ◆ Full handoff document: architecture, deployment, runbook
- ◆ Source code + GitHub repository ownership transferred

SECTION 03

Communication Standards

- ◆ **Response Time SLA**
All client messages responded to within 4 business hours. Urgent production issues within 1 hour during business hours. Emergency contact provided for all active clients.
- ◆ **Weekly Progress Updates**
Every Friday, a structured update email: features completed, features in progress, next week plan, any decisions needed. No surprises.
- ◆ **Staging Link Access**
Every client has 24/7 access to the staging environment throughout the build. You can review progress at any time without scheduling a call.
- ◆ **GitHub Transparency**
Your repository shows every commit with a message. You can see exactly what was built and when. No black-box development.
- ◆ **Post-Launch Support**
3-month support window: bugs within original scope fixed at no cost. Feature additions billed at package rates. Priority response SLA.
