

OUR CORE SERVICE OFFERINGS

Services Brochure

— Building digital workforces, not just websites —

Full-Stack Engineering

Next.js · React · TypeScript · FastAPI
· PostgreSQL

Autonomous AI Workflows

LLM orchestration · RAG pipelines ·
Playwright RPA

Robotic Process Automation

Headless bots · 24/7 execution ·
legacy systems

Transparent Pricing

Published rates. Free prototype
before any payment.

Engineering-First

The founder writes production
code on every project.

Deterministic AI

Strict JSON scaffolding on every
LLM integration.

8+

Platforms

Omni-channel publishing

100%

Custom-Built

No templates. Ever.

₹8,999

Starting From

Digital Launch — 4 weeks

COMPANY

Logic Intelligence Technologies

FOUNDER

Vikash Saravanan

LOCATION

Coimbatore, Tamil Nadu, India

WEBSITE

logicintelligencetechnologies.in

“Where Logic Meets Innovation” — every system we architect, every line we deploy.

CORE SERVICES

Full-Stack Web Apps

AI & LLM Integration

Robotic Process Automation

PostgreSQL & Supabase

CI/CD & DevOps

E-Commerce Platforms

RAG Pipelines

API Engineering

SECTION 01

SECTION 02

Enterprise Web Development & LLM Integration

We engineer high-performance digital platforms using React and Next.js with hybrid rendering — SSR for dynamic data, SSG for sub-100ms load times. TypeScript-first, Tailwind CSS styled, Lighthouse 90+ optimised, and ADA compliant. We build SaaS dashboards, client portals, e-commerce platforms, and admin interfaces backed by secure FastAPI backends and hardened Supabase PostgreSQL databases.

INCLUDED IN EVERY BUILD

- ◆ SSR & SSG hybrid rendering for performance and SEO
- ◆ TypeScript-first codebase with strict type safety
- ◆ Supabase Auth — OAuth, Email/Password, and Magic Links
- ◆ Row Level Security (RLS) on every database table
- ◆ Responsive, mobile-first design with ADA compliance
- ◆ CI/CD via Vercel with GitHub Actions integration
- ◆ Post-launch support — packages at logicintelligencetechnologies.in

We transform software into intelligent decision engines. Custom AI infrastructure embedded into backend services — not chatbot wrappers. Every LLM call uses strict JSON schemas, Pydantic validation, and retry loops. RAG pipelines, context-aware decision engines, DOM-parsing AI agents within deterministic typed scaffolding.

AI CAPABILITIES

- ◆ **Intelligent Routing**
LLMs classify and route emails, tickets with structured JSON output.
- ◆ **RAG Pipelines**
Document ingestion, embeddings, context-aware retrieval systems.
- ◆ **DOM-Parsing Agents**
AI reads live HTML and navigates portals autonomously at scale.
- ◆ **Structured Output**
Pydantic schema on every response. Retry loop on every failure.

SECTION 03

Robotic Process Automation

Python and Playwright headless bots run invisibly on cloud servers, clicking, scrolling, typing, and scraping identically to a human — at computational speed, 24/7. We automate workflows that competitors say are impossible. If a human does it on a schedule, a LIT bot handles it.

REAL-WORLD ROI METRICS

40 hrs 4 min	Manual data entry replaced by scheduled Playwright scripts.
10,000× Scale	Outbound bots expand operational capacity exponentially.
8 Platforms, 1 Trigger	Publisher handles LinkedIn to WordPress automatically.
Zero Login Fatigue	Bots manage sessions, CAPTCHAs, and retries automatically.

SECTION 04

Database & Cloud Arch

Bulletproof backends start with correct database design. Supabase PostgreSQL with Row Level Security written into SQL — JWT tokens can only query rows they are authorised to see. Critical for Healthcare, FinTech, and multi-tenant SaaS. Deployed to Vercel and AWS edge for global speed.

DATABASE & DEPLOYMENT STACK

- ◆ **PostgreSQL Schema Design**
Optimal normalisation, foreign keys, index strategy for high traffic.
- ◆ **Row Level Security**
SQL-level user isolation — JWT tokens enforce per-row permissions.
- ◆ **Supabase Auth & Realtime**
Auth flows, real-time subscriptions, edge function deployment.
- ◆ **Vercel + AWS Edge**
Global CDN ensuring sub-100ms response times worldwide.
- ◆ **GitHub Actions CI/CD**
Continuous deployment with environment variable management.

SECTION 05

Pricing Packages

All packages include a free working prototype before any payment. Transparent, itemised invoices. No hidden fees. Full details at logicintelligencetechnologies.in

Digital Launch

Starting from

From ₹8,999

For businesses going digital for the first time.

- ◆ Custom Next.js landing or website
- ◆ Mobile-responsive dark-mode de
- ◆ Supabase PostgreSQL backend
- ◆ Domain + SSL configuration
- ◆ 3 months post-launch support

logicintelligencetechnologies.in

Business Pro

Starting from

From ₹18,999

For growing companies needing advanced features.

- ◆ E-commerce or SaaS platform (fu
- ◆ Custom auth system & user roles
- ◆ Third-party API integrations
- ◆ Admin dashboard + analytics
- ◆ Lighthouse 90+ guaranteed

logicintelligencetechnologies.in

Enterprise AI

Starting from

Custom Pricing

For enterprises requiring autonomous AI workflows.

- ◆ Full-stack custom web application
- ◆ LLM / RAG pipeline integration
- ◆ Playwright RPA bot development
- ◆ Supabase RLS multi-tenant DB
- ◆ Dedicated retainer support
