

Enterprise AI Readiness Assessment Framework

Diagnostic Methodology for Data Feasibility & Model Deployment

Logic Intelligence Technologies â Official Corporate Publication

1. Data Governance & Hygiene

Evaluating enterprise data pipelines, schema consistency, deduplication, and regulatory compliance before model ingestion.

2. Latency & Infrastructure Economics

Benchmarking inference latency requirements, local versus cloud model hosting, caching strategies, and token cost forecasting.

3. Deterministic Safety Boundaries

Implementing strict input validation, prompt-injection defense layers, grounded retrieval bounds, and safe fallback responses.
