

Enterprise Technology Roadmap Template

Phased Architectural Transformation & Modernization Standard

Logic Intelligence Technologies â Official Corporate Publication

Phase 1: Stabilization & Security Baseline

Audit dependencies, eliminate unverified secrets, configure CI/CD gates, and secure all exposed database tables with RLS.

Phase 2: Core Platform Optimization

Implement unified design tokens, responsive layouts, unified back navigation, and high-performance server components.

Phase 3: Automated Growth Engine

Deploy automated lead scoring, CRM pipelines, calendar bookings, and contextual AI assistants.
