

Website Development & Launch Checklist

50-Point Production Engineering Quality Assurance Protocol

Logic Intelligence Technologies â Official Corporate Publication

1. Security & Authentication

- RLS enabled on all exposed tables. - Server-side authorization verification on all protected endpoints. - Content Security Policy (CSP), Strict-Transport-Security, and X-Content-Type-Options headers active.

2. Accessibility & Usability (WCAG 2.1 AA)

- Visible keyboard focus rings with high contrast. - Complete screen reader ARIA landmarks and descriptive alt attributes. - Accessible fallback surfaces for all glassmorphic and modal components.

3. Performance & SEO

- Canonical tags and Open Graph metadata on all public routes. - Clean sitemap.xml and robots.txt excluding private/authenticated routes. - Sub-second First Contentful Paint (FCP) and optimal Largest Contentful Paint (LCP).
